

# THERMO-CYCLER® TAC-300

**DESIGNED FOR ENERGY EFFICIENT HYBRID COOLING OF  
WAREHOUSES, INDUSTRIAL AND COMMERCIAL BUILDINGS WITH  
THERMO ROTATION® OR AIR TURNOVER HEATING SYSTEMS**

## **STANDARD FEATURES**

- Chilled Water Air Conditioning - DX systems also available
- Heavy duty welded steel frame construction.
- Energy efficient coil surface for lower fan horsepower
- Can help spot cool overheated areas in large buildings
- Locking enclosure prevents unauthorized entry.
- Low pressure belt driven fan delivers air quietly and efficiently.
- Premium efficiency fan motor reduces electrical consumption.
- Constant air circulation mode reduces stale air and moisture problems
- Energy effective dehumidification without hot gas bypass or reheat

## **UNIT SPECIFICATIONS:**

Unit Dimensions.....	60" w x 32" d x 9'4" h
Ship Weight.....	Approx. 980 lbs in 2 Sections
Electrical.....	Premium Efficiency 1½ Hp, Totally enclosed motor
Chilled Water Coil .....	Energy Efficient E-F with turbospirals (Copper Tube, Aluminum Fin)
Piping Connections .....	2" MPT Carbon Steel
Cooling Capacity .....	230 Mbh Total, 163 Mbh Sensible, 45 GPM at 40° EWT
Controls.....	Factory Mounted Setback Thermostat and Operating Controls
